## LOCAL JOTTINGS

In another part of this issue will be found an extremely interesting article on the weather and crops of 1911. Mr. Healey, the writer, has been a very painstaking observer, and his conclusions will be of great value to the farming community, and to readers generally.

A Box Social will be held next Wednesday in the basement of the Methodist Church in the interest of the organ fund. All the ladies are asked to bring a box with them. Admission free.

A meeting of Strathmore Amateur Dramatic Society will be held on Tuesday as usual. All members are requested to attend. New members particularly invited. Meeting at Mrs. J. Saunders residence at 8 p.m.

With the opening of spring, the skating rink has closed up. Mr. Wm. Ormrod, the proprietor, deserves the thanks of the public for the well-equipped and managed rink he has provided, more especially as we understand he has come out at the small end financially. Mr. Ormrod is at present on a short visit to Edmonton.

At the Citizens' Band concert on Wednesday Mr. and Mrs. H. Wooster gave as a duet Tennyson's beautiful poem "Break" to music composed by Mr. Wooster. It shows much ability, and was very well received by the audience. We understand that it is being published in London, Eng., shortly.

Mr. J. W. Palmer arrived back on Wednesday from Stanton, Iowa, where he has spent the winter.

Mr. H. B. Pether has sold 200 bushels of Stanley seed wheat to the Duke of Sutherland's farm manager at Brooks.

The fifth Alberta Musical Festival Competition will be held at Edmonton May 14, 15, and 16.

Mr. Andrew B. Clow is, as will be seen from our advertising columns, opening up a law office here. This is something that has been urgently wanted here, and Mr. Clow should soon build up a successful practice. After graduating at Edinburgh University with first-class honors, he was connected with a Winnipeg law firm, and subsequently with Messrs. Leitch, Jones, and Mackay, Calgary, so that he has considerable experience of Western conditions.

As will be seen from our advertising columns, Mr. F. T. McElhoes has sold the impenetrable department of his business to Messrs. Michaelis and McLaughlin. The latter intend to erect a warehouse at the corner of 1st Avenue and 3rd Street, opposite the King Edward Blacksmith Shop.

Professor Elliott has just received fifty copies of a very useful bulletin published by North Dakota Agricultural College dealing with alfalfa. These will be given away as long as they last to all applying for same at the Demonstration Farm.

Two more of our townsmen who got married while in the Old Country this winter, Messrs G. W. Major and A. Townshend, arrived back Sunday with their respective brides. Major's sister and Mr. Townshend's brother also arrived here with them. Congratulations.

Mrs. E. E. Zerkle and child arrived back Wednesday.

Mr. Frank Garnick, with his wife and two children, arrived here from Fort Collins, Colorado, this week.

Mr. and Mrs. H. R. Kinn have today for Vancouver Island.

Article on Presbyterian Church meeting, also several other news items, unavoidably held over.

## Athletic Association Formed

**BIG BANQUET IN MAPLE LEAF**

Arising out of the hockey match, played within the past fortnight between the King Edward and Maple Leaf Hotels, where the losers agreed to put up a supper, a banquet was held in the Maple Leaf on Tuesday evening, which was attended by between forty and fifty of the local townspeople, including the majority of members of the Town Council. Getting the townspeople into line for the coming baseball and football season was the reason for extending the scope of the gathering, and it succeeded eminently in this object.

**MAYOR'S ATHLETIC RECORD**  
After the assembled guests had been put into the best of humor by a sumptuous repast, prepared in the Maple Leaf's best style, Mayor Lambert, who acted as toastmaster, said they had to thank their hosts, Messrs. Sherman & Troy, for the splendid supper they had put up. With reference to the main object of the gathering, it was of the utmost importance that they have lots of sport of the right kind in town. One of the main requisites for success in athletics was training. He had been somewhat of an athlete himself in his days, and he had won many prizes, and he might also say had lost many, but he could confidently say that he had won more than he had lost. He found that one thing absolutely necessary was training, and lots of it. The interests of sport in Strathmore were the interests of the whole community, and he looked forward to them having a very successful sports season. The first toast proposed was that of "The King," proposed by Councillor Brown, in his usual felicitous manner, and equally well responded to by Mr. Stanley, of the R.N.W.M.P. **STRATHMORE ATHLETICS**  
It fell to the lot of Mr. Sly to propose the toast of "Strathmore Athletics." In regard to this all-important toast, the speaker said that one of the things that Strathmore lacked was a well equipped gymnasium, and it might also be possible to get a set of public baths once the McAlister Lake water-works system was installed, which he hoped would be in the near future. They also wanted to have a good sports ground, and thought with the co-operation of the town Council, the School Board, and the Exhibition Company, which they would be certain to get, they could secure a first-class permanent sports ground. An athletic Association, which would cover the various kinds of sport throughout the year, would be a good organization for the town.

## NO TIME TO BE LOST

In responding to the toast, Mr. Thos. E. Wright, who is one of the best all-round sportsmen in town, said that they had very few baseball grounds and a good football grounds. Baseball was the game that received the most attention here, and they should get together this spring, and have a team that would be at least equal to anything in the Bow Valley. They ought to get busy at once on it, for the other towns on the line were already making a move. They had a fine baseball team last year, and they could have a fine team this year if they set about it in the right spirit.

Other toasts were "The Press" proposed by Dr. Givins and responded to by Mr. John MacKenzie, and "The Ladies" proposed by Mr. G. W. Stevens, the new accountant in new accountant to the Union Bank, and responded to by Mr. Nelson. All the speakers mentioned had something to say on the subject of sport in Strathmore, and expressed their confidence in Strathmore as a good sports town. Mr. G. Longhills made a few appropriate remarks.

Mayor Lambert moved a vote of thanks to the managers of the hotel for their kindness in bringing them together that evening also to the pianist, and to Mr. Stanley who had contributed several fine songs during the course of the evening. The Mayor said that the interests of sport in Strathmore would always have the best assistance of the Town Council and the citizens generally.

**GOOD ADVERTISING**  
Mr. Troy in responding, said he was very well pleased to see many present, and to see the enthusiasm taken in the forthcoming sports season. It was of the utmost importance that Strathmore should be strong in every branch of athletics. There was no cheaper or better

# DOMINION BUDGET SHOWS PROSPERITY

## New Finance Minister Presents a Clear and Comprehensive Statement of Dominion Finance—Canada's Prosperous Era

Ottawa.—Hon. W. T. White delivered a first-class speech, presenting to the house a financial statement showing for the current fiscal year a magnificent surplus of \$11,000,000. The speech was one of the most lucid and comprehensive positions of national finance ever given in parliament.

The budget contained no special features, but it was a masterpiece of the surplus. There are to be no tariff changes and steel bonuses are not to be restored so far as the present session is concerned. The decision in this respect was reached by the government after a great deal of very careful consideration. In view of the situation was overruled. Mr. White stated that in view of legislation establishing a tariff commission, it would be unwise to report it had been decided to make no change in the tariff.

Requests for tariff changes had been made, but there appeared to be no need to grant them. The government would consider them on the side of the house.

A. K. McLean of Halifax, whose duty it was to criticize the budget for the month of March, said that the total credit for the late fiscal year was \$11,000,000. The total revenue for the current fiscal year, including an estimate of interest on the public debt, was \$1,315,000,000, and expenditures on the same account were \$1,304,000,000. The amount going to sinking fund and account is \$11,000,000. Mr. White said the government minister of finance desired that the money should be used on the side of the house.

## The Farmer's Season of 1911

By J. Hearn.

In accordance with promise made to you in the full 1910 down extracts from my log book, these will be which may be interesting and possibly of some use to your readers, especially to those who reside in our own Alta land.

From the middle of March 1911 it will be in the recollection of most, we had somewhat premature Spring weather which lasted till the ending days of it and encouraged a start with Spring seeding. I noticed farmers round Cheate drilling into the night new snow fall and others nearer home did the same. I do not think this very early seeding showed at harvest the full result of the gain in time, but anyhow the work was so much the more of the way and do not know of any fields of March seeding which required re-doing. It would be interesting to hear from some one on this point?

March ended in very stormy weather and stopped all work for several days.

As the season generally opened round the 1st of April, from that date I supply you with weather reports as it was experienced by me in a tabular form, for weather is one of the most important items in considering the season.

April 1. Heavy storm, new snow lying very deep.

2. Snow gradually melting, a W.

3. Snow going rapidly with W.

4. Ground clear, mild.

5. Drifting snow from NW by W.

6. Snow melting.

7. Land ready for plowing and seeding.

8. Hailing for half a day (the first of the season).

9. Hailed gently all forenoon.

10. Heavy rain started in the night.

11. Hail started last night—continued all day.

12. Hail showers.

13. Rain showers in afternoon.

14. Snowed heavily in afternoon.

15. Snow lying and continued falling all day.

16. Snow melting.

17. Hail showers.

18. Hail showers.

19. Hail showers.

62. Hail showers.

63. Hail showers.

when some of it stood over six feet high. Yield (thresher's measurement) forty-three bushels to the acre. Good commercial grade, high germination. The seed was choice Claresholm Red Fife.

The soil is rather stiff, and lies high on a gradual slope to N. It had been broken and disked two years previous, and lain untouched for some time, when there was not more than time to disk it in. The soil was therefore very hard and so large a proportion of seed would not respond to drill and lay thick on ground, that I almost stopped seeding.

Weeds came threatening, but the exceptional moisture saved the crop, which rooted strong and lusty and crowded out the weeds though I used not quite two bushels of seed to the acre.

All the working the land had after seeding was to run over, with a plow. A severe wind at cutting time shealed out more than another bushel an acre.

OATS

One field, finished seeding 27th April, three to four inches high 27th May, nine inches high June 5th, June 18th one foot six inches high, July 7th began to head out, 6th Aug. slowly coloring, 18th Aug. began cutting. Soil light, sandy, high elevation, straw not exceptionally high except in a few places. Yield looks in stack about 75 bushels to the acre. This land broke previous year but had nothing more till repeated diskings this spring.

Seed from Namaka.

Another field of Oats, under conditions and on land same as the above. Finished seeding 18th May, began to show above ground 28th, began cutting 9th Sept., but part ripening slowly on account of the weather conditions was not cut till the end of the month. Same seed as the other field and same amount, two and a half bushels to the acre. Straw much taller, yield for bushels per acre, weighing 43 lb per bushel, germination over 90 per cent, and selling for seed.

FLAX

Seeded 12th to 20th May (another year under same conditions in spite of common usage, would seed two weeks earlier if color work permitted and do not think would be taking a serious risk by so doing).

Began to appear at end of month but the only seed obtainable being poor, it germinated slowly and was put in unnecessarily deep. The consequence was a very thin growth, but it had room to branch well. Weeds were of course troublesome as the flax was not close enough to crowd them out and entailed a lot of hand pulling. The result will be when thrashed a big proportion of marketable seed destroyed.

It began to flower July 8th, but one trouble with the over moisture was that it never finished flowering, though Sept. 4th it had hardened as a whole and began to color before the frost. Began to cut Oct. 31st, finished stacking 19th as it was in dry condition.

FIELD TURNIPS

A small experimental crop, Yellow Swedes drilled in 20th May on dry land, singled 26th June, pulled, 18th October. Good in quality and a fair yield. Would have been larger but for fly and rabbits. Proving a nice change over stock this winter.

POTATOES

Planted 15th May, local seed, 3000 up 17th June, first used 27th July, tops slightly nipped with frost August 27th, cut about 7th September, finished ploughing up and pitting 7th October, in quality and yield equal to the best (on the soil) satisfactory. (Planted for a normal year low lying between ditches, found sewage more than necessary and rather troublesome.)

GARDEN TRUCKS

Mostly sown 15th May, as a whole did well especially radish and spinach, carrots, peas, in second rank onions, parsley, lettuce, not a good deal of watering. First experimental beds of asparagus, and celery, covered over for start another year, result yet to be proved.

SUN FLOWERS

Sowed them liberally along top ditch 15th May, grew to immense size where not too moist, a few big crows flowered before frost came, but few more from frost. Some began to flower in late August, but few more from frost. Some began to flower in late August, but few more from frost.

HAVING

Began cutting prairie grass 14th July and hay making dragged on intervals, with fine weather till 4th September. Irrigated a small pasture, which very little affects the crop of clover grass, but considerably improved the fall pasture.

Having provided you with the tables and data of weather and the crops, I might leave them to your readers to make their own comparisons and draw their own deductions but I am inclined with your permission to add briefly some remarks.

REMARKS

Glancing over the weather table it is evident that the weather of the rain or snow fall all over the season, although the over moisture was most serious in its consequences, of course in middle of August, which had it been dry and sunny would have given a very different complexion to the general harvest result. For two weeks grain practically showed no progress.

WHEAT

Seeded the last four days of April and the first four of May (ten days late as afterwards related to).

On the 26th May three inches high, on the 6th June seven inches high, on 24th July three feet three inches high. Began cutting 13th Sept.

## Athletic Meeting

Continued From Page 1

publicity than that which was given to a town by a successful basketball team. One thing he might mention was in regard to the Strathmore Hockey Club. They had not had a successful team this winter, but they had a team that was done all through. It was an easy thing to be done when a team was winning, but it took far more pluck to play through a schedule when the team was losing often, and the Strathmore boys had shown they had the grit when their luck was against them.

THE HOCKEY CLUB  
Councillor Brown moved a vote of thanks to the Strathmore Hockey Club, which was heartily given.

Dr. Givins responded. The hockey club had never allowed themselves to be discouraged with non-success, as some other teams had done in the Bow Valley Baseball last year.

BASEBALL CLUB'S GOOD RECORD

Mr. O. J. Evans, said that the baseball club had had a very successful season in the Bow Valley League and one of the friendly games with the Calgary Legion, whom they played an eleven-innings game with. Thanks to the generous support of the townspeople, they had come out with a balance in hand.

Amid much enthusiasm it was agreed to form a Strathmore Athletic Association, and a committee of five, consisting of Messrs. T. E. Wright, Troy, O. J. Evans, H. Stanley and Dr. Givins, was appointed to arrange preliminaries.

This being brought to the last public appearance of Councillor Gladue in Strathmore, he was called upon for a speech, and in response said that he regretted very much that he was leaving Strathmore. He had been four years in town, and he had done all in his power in its interests. No matter where he went, he would always have the interests of Strathmore at heart.

After several more fervent remarks, a very enjoyable evening was closed to the strains of "Auld Lang Syne."
